PROFILE

Third-year Electronics & Telecommunication Engineering student with hands-on experience across **embedded systems, electronics, automation, Python, Java, Microcontrollers, Sensors, IoT, and Electronic Circuit Design**. Completed a Trainee Developer Internship at **iBase Electrosoft LLP**, with exposure to **Artificial Intelligence and Machine Learning**. Seeking entry-level opportunities in embedded/electronics, IoT, automation, software or UI/UX roles.

EDUCATION

Bachelor of Engineering (B.E.) — Electronics & Telecommunication Engineering

Pravara Rural Engineering College, Loni | Third Year

INTERNSHIP EXPERIENCE

Trainee Developer Intern — iBase Electrosoft LLP

31 January 2026 – 09 February 2026 | 10-Day Internship | Remote

- Gained practical exposure to Artificial Intelligence and Machine Learning concepts and their real-world applications.
- Learned the fundamentals of AI/ML workflows, including problem understanding, data handling, model concepts, and application development.
- Developed an understanding of how Python and AI/ML concepts can be applied to solve technical problems.
- Gained hands-on experience with Python libraries such as NumPy, Pandas, and Matplotlib for numerical computing, data handling, analysis, and visualization.
- Participated in guided hands-on learning activities and technical training as a Trainee Developer.

PROJECTS

- **Car Speed Detection System**
Developed a system for detecting and monitoring vehicle speed using embedded-system concepts. Implemented sensor-based detection to capture speed-related data and generate real-time output.
- **Water Level Monitoring System**
Developed a sensor-based system to monitor water levels in real time. Integrated sensors with a microcontroller to detect water-level changes and provide monitoring output.
- **Inventory Management System**
Developed a Java-based application to manage inventory records and related operations. Used JDBC for database connectivity and handling inventory data. Implemented basic application logic for adding, updating, and managing inventory information.

TECHNICAL SKILLS

Programming language: Python, Java

Embedded & Electronics: Embedded Systems, Microcontrollers, Sensors, Electronic Circuit Design, Chip Design Fundamentals

IoT & Automation: IoT, Home Automation, AI Applications

Design & Tools: UI/UX Design, Wireframing, Prototyping, Usability Testing

CERTIFICATE

AI & ML Internship Certificate : iBase Electrosoft LLP (2026)

C Training: EduPyramids, SINE, IIT Bombay | Score: 85%

UAS/Drone Technology Bootcamp: C-DAC, Pune (2026)

CORE STRENGTHS

Problem Solving • Hardware-Software Integration • Rapid Learning • Team Collaboration • Technical Project Development
